

A Complete Family Gas Engines Products

EGC 4

Electronic Gas Carburetor for Engines from 250 hp to 500 hp

EGC 2

Electronic Gas Carburetor for Engines from 10 hp to about 250 hp

Catalyst Monitor and Data Logger

Health Monitoring of NSCR or Oxidation Catalysts

ECV5

Emissions Control Valve

VM350

Mixing Venturi for Mixing Air & Fuel

GV 1

Electronic Gas Fuel Valve

VMI 600

Venturi Mixing Inserts for Existing Carburetors

Continental Controls Provides Air-Fuel Ratio Control for Gas Engines:

- State-of-the-Art Control for all Gaseous Fuels
- Designed for Rich or Lean Burn Operation
- Maintain Emissions Compliance even with Difficult Operating Conditions
- Improved Mixing of Air and Fuel
- Meet Tomorrow's Emissions Standards Today

All Fuel Valves Have Been Designed Specifically for Ultra-low Emissions Control on Gas Engines.

Call Today!

Our sales and engineering staff will be happy to help you select the perfect fuel valve for your application.
